Samuilenko Vyacheslav

samujlenkoslava@gmail.com | Telegram @ivanaki | github.com/Ivanaki

Developer and first-year undergraduate at Central University. Delivered a gamified onboarding product for a UAE client, completed a game development internship, and won national VR competitions. Experienced in taking projects from concept to a working prototype under deadlines.

EDUCATION

Central University | Mathematics and Computer Science | 2026 - 2030

First-year bachelor's student. Expected graduation: 2030. Member of the university hackathon team.

EXPERIENCE

Kanpeki Consulting, UAE | Software Developer Intern | 15 Jun - 15 Aug 2026

- Built OurTown, a gamified employee onboarding product, as the sole programmer working with a designer.
- Implemented the Unity game, React/TypeScript website and ASP.NET Core/PostgreSQL backend, including browser gameplay, role-based access and server-side progress saving.
- Worked directly with the CEO and a company representative; delivered the agreed scope on time and received client acceptance.

Ninsar.Games | Game Developer Intern | Early Aug - mid-Sep 2026

- Developed four mini-games for an unreleased point-and-click project; completed assigned tasks and incorporated feedback after review. Project details covered by NDA.

SELECTED PROJECTS

Paws&Parcels | Sole Programmer | Unity, C#

- Delivered a complete MVP of a 3D delivery game in approximately two months plus a week of final development.
- Wrote the quest, cargo handling and save/load systems. Selected and implemented a service-based architecture using Zenject, with MVVM for the UI; adapted vehicle physics for cargo transport.
- The team received special recognition from Ninsar.Games at the National Technology Olympiad, leading to an internship.

Chestny Mesyats | Team Member | CU Hackathon

- Helped deliver a working Telegram bot and Mini App prototype for expense tracking in six hours. Features included voice and screenshot input, spending analysis and gamification.
- The team also prepared customer pain-point and competitor analysis, a pitch deck and a promotional video; won first place and qualified for the Central University hackathon team.

AWARDS

- National Technology Olympiad, Virtual Reality: winner in grades 10 and 11; team placed first in both editions. Overall winner in grade 10. Lead programmer.
- IT-EducationHack, VR track: first place with the team, April 2025.
- My Profession IT, Voronezh regional event: Best Developer award and second place, November 2024.

TECHNICAL SKILLS

Programming languages: C#, Python, TypeScript.
Engine and frameworks: Unity, React, ASP.NET Core, FastAPI, Zenject.
Architecture: Service-based design, dependency injection, MVVM.
Database and tools: PostgreSQL, Git. Development with AI tools.

LANGUAGES

English: B2. Russian: native.
